Real Cinema At Home

WHY ATMOS?

We're here to nurture minds by creating corners of happiness for all. These corners can be about sharing thoughts, venting out, uplifting spirits, feeling rejuvenated and new by all means. These recreational rooms will give therapeutic recreational experience for a holistic development of mind.

Yes, it's a therapy for all!

1.

FROM WHERE WE BEGAN

Initiation of our company was in the year 2000 in a small office space with big dreams to become India's leading Home Cinema Brand.

With sheer hard work and passion, we now successfully run two premium showrooms in Satara and Baner area of Pune.

We offer consultancy in Acoustics and AV which is a rare combo to believe in. Our expertise, experience and determination helped us to build a loyal clientele that only grows every passing year.

Our approach towards life is progressive and we remain true to our principles.

About

2.

THE IDEA OF RECREATION

Acoustics is the science of sound that connects engineering for the delivery of sound waves to the human ear. A lot of factors are taken into consideration while creating the best atmosphere for a human which are reverberation, speech intelligibility, noise control, sound insulation, sound recording and playback of sound to name a few.

One needs to be intellectually experienced to deliver this kind of service. Our idea behind creating recreational rooms with a first-rate service was only to help people live their life to the fullest. Balancing work and life can sometimes be exhausting to a human mind and can hamper the mental status severely.

We want people to feel, recreate and breathe in the recreational rooms we create for them.

3.

REDEFINING THE WORLD OF RECREATION

The concept of recreation struck us hard when we visited workplaces and realized that in this ever-so-stressful life of a human, one needs to feel alive. One needs to play to feel alive. One needs to share to feel alive. One needs to experience joy to feel alive.

We're a group of people who believes in giving a recreational experience to people by creating corners of happiness in places of work. Be it resorts, educational institutes, clubs, sports bars, residences, hospitals or work places, everybody needs to feel rejuvenated and reenergized at some point of life.

We're here to give you that blissful experience!

OUR INFRASTRUCTURE WORK

We offer a host of infrastructure services in areas like Acoustics and AV Systems and Security Systems.

We have build Auditoriums, Acoustic Ceilings, Home Theatres, Banquet & Multi-Purpose Halls, AV Recording Studio and much more for our clients.

We've worked a versatile client base from architects to builders to hoteliers. The experience with all has been inspiring us to grow further and beyond our expectations!

- Smart Locks
- Digital Door Locks

4.

SPORTS

Stadiums, gymnasiums, health clubs, dance studios, etc. are investing increasingly in the sound system management. ATMOS has redefined the way sound is carried through a magnanimous space.

With high ceilings and larger spaces in sports places, there are innumerable problems affecting the sound within the premises. Having a thorough experience and expertise of the products to be used, we offer solutions that eliminate problems like echo, sound proofing, reduction of secondary waves, low frequency spectrums or any other sound disturbances with our finest quality of products.

We offer the following for this industry:

- Security System (CCTV, Video Door Phones, Intrusion Detection System, Fire Alarms, etc.)
- Pro Audio System
- Speakers
- Amplifiers
- Display System
- Sound Proofing
- Smart Locks & Digital Door

5.

EDUCATION

Schools, colleges or other educational institutions intelligently accommodate good acoustics and Audio/Visual design system for a smooth functioning of student assembly, speeches or events.

ATMOS helps these educational places with the best-in-class sound system in music room, digital classrooms, auditoriums, event halls, computer labs, etc. As the technology has evolved, we have evolved too with the wide range of AV products that lasts long.

Our independent analysis and design specifications make sure the audio visual systems deliver the desired sound and visual reproduction. We custom-design AV systems to meet specific needs for learning and recreational spaces; providing optimum audio and visual clarity. Our AV systems solutions for school facilities offer scalable, flexible audio visual systems to meet both performance and budget criteria.

We offer the following for this industry:

- Security System (CCTV, Video Door Phones, Intrusion Detection System, Fire Alarms, etc.)
- Audio System
- Speakers
